Sustainability in short

Sustainable development is about preserving the planet while improving the quality of life for its current and future inhabitants.

The Triple Bottom Line

At Novo Nordisk, sustainable development has been an integral part of the way we do business for more than a decade. Our way of translating it into practice is the Triple Bottom Line.

In all our work, we strive to be economically viable, socially responsible, and environmentally sound.

Balancing the Triple Bottom Line is about considering each of these elements when making business decisions. In this way, we not only manage a sound business, but we also demonstrate our commitment to driving sustainable development – both locally and globally.

changing partnerships in diabetes
